# THE **BluBird** ADVANTAGE...

*SOPHISTICATED. INNOVATIVE. TRUSTED.*

Designed with professionals in mind, BluBird delivers high-performance hose solutions that combine innovation, durability, and exceptional value. With over 30 years of industry expertise, BluBird has developed a full line of advanced general-purpose hoses and retractable metal hose reels—engineered to withstand extreme environments and meet the demands of users around the globe.

BluBird is the only manufacturer in the world producing both its hoses and the reels they're paired with—ensuring seamless integration, top-tier quality, and industry-leading performance. Built on decades of R&D, BluBird's technology sets the standard for flexibility, strength, and ease of use. From extreme cold to intense heat, BluBird hoses deliver unmatched reliability in any condition.

**AS LIGHT  
AS A FEATHER**

Safest | Strongest | Most Flexible

40% LIGHTER than Standard Rubber Air Hoses  
100% RUBBER

Flexibility in extreme conditions from -46°C to 90°C.

300 PSI Working Pressure

1200 PSI Burst Pressure

4:1 Safety Factor Design

BluBird hoses are 40% lighter, stronger, and more flexible than standard rubber hoses. They offer superior cold weather flexibility, performing reliably in temperatures as low as -50°F and maintaining their integrity up to +190°F, making them ideal for year-round use in most parts of the world.

Each BluBird hose features an abrasion-resistant outer cover, high-strength woven polyester reinforcement to prevent elongation, and industrial-grade thread and yarn for added durability. This construction delivers a 300 PSI working pressure and a 4:1 safety burst ratio, setting a new standard for performance and reliability.

- Solid brass fittings offer superior durability and corrosion resistance compared to aircraft-grade aluminum.
- High-strength polyester braided reinforcement provides exceptional burst resistance and structural integrity.
- Maintains flexibility and performance even under extreme weather conditions — from freezing cold to intense heat.
- Ozone-resistant for enhanced longevity in outdoor environments.
- Abrasion-resistant outer cover protects against wear and tear.
- Kink-resistant design ensures uninterrupted airflow

SUPERIOR COLD WEATHER FLEXIBILITY.

## RMA Class A Oil Resistant Air Hose

Flexibility in extreme conditions from -46°C to 90°C.

300 PSI Working Pressure

1200 PSI Burst Pressure

4:1 Safety Factor Design

Oil-Shield® sets the standard as the best-performing shop hose on the market today. Made from 100% rubber with a Nitrile core and Nitrile outer cover, it delivers a Class A oil-resistance rating—the highest rating possible.

Unlike traditional rubber hoses that are heavy and inflexible, Oil-Shield is 30% lighter, more flexible, and stronger, making it easier to handle without sacrificing durability. It's engineered to perform in demanding workshop environments, offering reliable resistance against oil, diesel, gasoline, cleaning agents, and even welding spatter and grinding sparks.

- RMA Class A oil-resistant core tube and cover — the highest level of oil resistance available
- Resists welding spatter and grinding sparks — ideal for tough shop environments
- Solid brass fittings — more durable and corrosion-resistant than aircraft aluminum
- High-strength polyester braided reinforcement — prevents elongation and enhances durability
- Maintains flexibility and integrity in extreme temperatures and working conditions
- Ozone-resistant — built to withstand outdoor exposure without cracking

30% LIGHTER than Standard Rubber Air Hoses

Safety Factor Design

Avagard represents the next generation of the classic red rubber hose. Unlike traditional rubber hoses that tend to be heavy and stiff, Avagard is engineered to be 20% lighter while delivering superior flexibility and strength. This innovative design makes it easier to handle without sacrificing durability. Built to withstand demanding conditions, Avagard hoses come with an unmatched 5-year warranty, reflecting the confidence in their long-lasting performance. Offering a perfect balance between quality and affordability, Avagard provides excellent value at a competitive mid-range price point — making it the smart choice for both professional and everyday use.

- Solid brass fittings — superior to aircraft-grade aluminum
- High-strength polyester woven braided reinforcement for maximum durability
- Maintains structural integrity under extreme weather conditions
- Flexible from -40°C to +88°C
- Ozone resistant for long-lasting performance
- Abrasion resistant to withstand rough use
- Kink resistant for uninterrupted flow
- Four Finger Grip Bend Restrictor enhances control and reduces wear for easier handling

Reinforcement

The Avagard Water Hose offers pro-level performance at a mid-range price. Made from 100% rubber, it's 20% lighter than standard rubber hoses while remaining tough, flexible, and durable. Rated for hot water up to 212°F, it's ideal for automotive, industrial, and general professional use. An ozone-resistant cover protects against weather, kinks, and abrasion, while braided polyester reinforcement adds strength. The Four Finger Grip Bend Restrictor improves control and reduces wear, and plated brass fittings provide secure, rust-resistant connections.

BluSeal Rubber Water Hose sets a new standard in performance. Made from 100% rubber, it's the lightest, strongest, and most flexible rubber hose available—ideal for lawn, garden, and hot water use. An ozone-resistant cover protects against weather, abrasion, and kinks, while polyester braided reinforcement ensures durability. The Four Finger Grip Bend Restrictor improves control and prevents wear at the ends, and plated brass fittings offer secure, rust-resistant connections.
